MHS EDITH-550 water-cooled

550 Ampere at 100% duty cycle (CO_2) - 500 Ampere at 100% duty cycle (mixed gas)

Operating instruction

Screw laminated fabric-tension sleeve right-hand thread (60) down until it goes no further.Put large o-ring (64) against the fabric tension sleeve (60). Now mount the water-jacket (67) on the fabric tension sleeve(60) by pushing it over the o-ring(64). Put the small o-ring(64.1) into the water jacket(67) and put the insulating sleeve(69) on top. Now screw in the tip-holder (62) and tighten it firmly using an open end wrench. Now screw back the fabric tension sleeve a little to give some pressure to the o-rings underneath the water jacket. The o-rings are pressed against the water jacket sealing the water circulation between them. Finally screw in contact tip (70) and screw on the gas nozzle(81) with insulating sleeve (86).
