Benefits.

This box supports rapid changes between different screw profiles and keeps frequently needed inserts to hand in a clear layout.

Highlights include the magnetic quick-change holder and long TORX inserts, complemented by short standard bits.

The colour coding, transparent lid, and organised layout make it significantly easier to select what you need, check the contents, and refill.

Centred on screw technology, it arose from the demand for standard-compliant interchangeable bits for varying connectors.

The target group includes assembly specialists and service teams who need to cover many drive profiles with minimal set-up time.
