Benefits.

Practical headlamp for various activities such as maintenance work on industrial plants and work in technical rooms and warehouses.

Up to 9.5 hours of light (depending on the operating mode) thanks to the built-in Li-ion battery (3.7 V/1,200 mAH/4.44 Wh).

The elastic, adjustable headband ensures a secure fit and prevents slipping.

Rechargeable LED headlamp with high light output of up to 450 lm.

The headlamp can be switched on and off with simple hand movements thanks to the integrated gesture sensor.

Product highlights.

Multiple illumination.
The headlamp combines a powerful COB LED strip with a front LED spotlight. This allows you to choose between wide area illumination or focused spot lighting. Thanks to the choice between red light (8 lm) and white light (450 lm), it adapts optimally to any situation.

Hands free.
Our headlamp is equipped with a sensor that allows it to be controlled by hand movements – for greater safety and flexibility when illuminating confined areas or when on the move.

Optimal carrying comfort.
The elastic headband can be individually adjusted and offers a secure and comfortable fit without slipping, even during intensive movement. Including the battery and strap, the light weighs only around 100 grams, making it a convenient helper for long inserts.

Endurance meets fast charging.
With its powerful 1,200 mAh battery, our rechargeable headlamp offers a remarkable runtime of up to 9.5 hours, depending on the selected light mode. Using the included USB-C cable, the lamp can be fully charged in just 2.5 hours and is ready for the next use.
