Benefits.

This set supports high-power socket work on large hex, TORX, XZN, and INHEX connections in service.

Highlights include the telescopic ratchet and QuickRelease fine-tooth ratchet, complemented by corresponding IMPACT inserts and extensions.

The coordinated set facilitates high force transmission, reduces the effort involved in converting, and supports reliable work sequences in service deployments.

Centred on socket technology, it arose from requirements for high-power bolted joints in maintenance, assembly, and repair.

The target group includes automotive specialists and repair technicians who regularly need 1/2” components for demanding bolted joints.
