Benefits.

This set supports striking, straightening, and extraction work when loosening tight connections, as well as precise positioning.

Highlights include the engineer's hammer and dead blow hammer, complemented by a chisel, centre punch, and driver.

The coordinated selection facilitates clean force transmission, reduces the effort involved in finding the right tool, and supports precise, reproducible manual work.

Designed for metal construction trades, it arose from traditional requirements of manual cutting, straightening, and assembly work.

The target group includes metal constructors, repair technicians, and workshop specialists who require sturdy striking tools for recurring workshop tasks.

Technologies and features.

Tool Control System
The intelligent modular inlay system protects and organises the tools in tool boxes, tool trolleys and workbenches. Two-colour foam inlays make checking the completeness of the tools quick and easy.
