Benefits.

This set supports testing, cleaning, and disassembly work on vehicle components and the measurement of typical states of wear.

Highlights include the caliper and universal self-grip wrench, complemented by a mirror, test lamp and driver.

Designed for automotive trades, it arose from typical diagnostic, disassembly, and service tasks in day-to-day work in the workshop.

The target group includes automotive specialists and service teams who need to keep measurement, test, and disassembly tools organised and ready to hand.

The organised inlay makes visual checks easier, reduces the time needed to access a tool, and supports structured service processes in recurring testing tasks.
