Benefits.

This set supports the removal of damaged screws, visual inspections, and precise measurement tasks in technical service.

Highlights include the screw extractor set and caliper, complemented by a test lamp, mirror, and feeler gauge.

The structured inlay simplifies test procedures, reduces the time needed to find a tool, and supports focused work steps in fault diagnosis and rework.

Designed for vehicle service, it arose from the combination of diagnostics, rework, and testing requirements in modern workshops.

The target group includes automotive specialists and workshop teams who use diagnostic tools, measuring equipment, and boring components in an organised format on a day-to-day basis.

Technologies and features.

Tool Control System
The intelligent modular inlay system protects and organises the tools in tool boxes, tool trolleys and workbenches. Two-colour foam inlays make checking the completeness of the tools quick and easy.
